ADDENDUM

The Zoning Administrator requires the following information in order to review and sign any subdivision plat for zoning compliance. The provisions of DCMR 10, Section 2703 require a preliminary sketch, drawn to scale and including but not limited to the following;

1. Boundary of the land to be divided (Plat showing how the land is currently configured **before** subdivision);
2. Provide a building location survey (Man made features, such as buildings, structures, walls, fences, culverts and sewers must be shown, be sure to indicate length and width dimensions, setbacks, and number of stories);
3. If you are subdividing Assessment & Taxation lot(s), provide the date the lot(s) were created (Subdivision history)

When submitting the original Mylar plat for approval by the Zoning Administrator, the scaled sketch showing the above items must be provided with the subdivision plat.

The District Department of the Environment (DDOE) requires, for review and approval for compliance with DCMR 20, Chapter 31 – Flood Hazard Rules, that any subdivision located in whole or in part in a Special Flood hazard (SFHA) that is greater than 50 lots or 5 acres, whichever in the lesser, shall provide Base Flood Elevation* (BFE) data with the subdivision application, pursuant to 20 DCMR 3104.5

1. BFE data can be obtained from the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Map (FIRM) and Flood Insurance Study (FIS) for the District of Columbia, effective date September 27, 2010.
2. Pursuant to 20 DCMR 3104.8, if BFE data is not available from the FIRM or FIS, the applicant shall develop BFE in accordance with current accepted hydrologic and hydraulic engineering practices. When developed by the applicant, BFE data shall be certified by a District registered professional engineer (PE).

* Base Flood Elevation is the elevation of the 100-year flood (the flood having a one percent (1%) chance of being equaled or exceeded in any given year.
